

## BALANCE

Uranoteženost u obliku i isplativosti

U smislu ekonomičnosti i dizajna BALANCE nudi potpuno nove dimenzije izrade krova. Izvanredna kvaliteta i usavršeno preklapanje utora brinu o trajnom očuvanju vrijednosti. BALANCE se uspješno upotrebljava kod krovova većih dimenzija i kod manjih krovova radi svojih usklađenih proporcija.

Utrošak crijeva iznosi oko 8,4 kom/m<sup>2</sup>, a osim toga odlikuje se izvanrednom kvalitetom i ljepotom te uspostavlja i nove standarde u pogledu omjera cijene i učinka. Svoju savršenu statiku zahvaljuje utorima sa donje strane crijeva.

- Bitno svojstvo: južnjački šarm
- Klasični valoviti oblik
- Engobirana površina velike tvrdoće
- Zahvaljujući velikom formatu daje ekonomično rješenje (8,2 kom/m<sup>2</sup>)
- Savršena vodonepropusnost zahvaljujući dvostrukim utorima
- Već od 10° nagiba krova
- Na raspolaganju je široki izbor glinene krovne opreme

## TEHNIČKI PODACI

Dimenzije(cca.)	323 x 502 mm (milimetar )
Min.pokrovna širina(cca.)	274 mm (milimetar )
Srednja pokrovna širina(cca.)	275 mm (milimetar )
Maks.pokrovna širina(cca.)	277 mm (milimetar )
Min.letvanje(cca.)	406 mm (milimetar )
Letvanje preporučeno(cca.)	419 mm (milimetar )
Maks. letvanje(cca.)	431 mm (milimetar )
min. utrošak crijeva (cca.)	8.4 kom/m <sup>2</sup> (komada po metru kvadratnom)
Utrošak crijeva prosječno(cca.)	8.7 kom/m <sup>2</sup> (komada po metru kvadratnom)
Maks.utrošak crijeva	9 kom/m <sup>2</sup> (komada po metru kvadratnom)
Masa po komadu(cca.)	4.9 kg/kom (kilograma po komadu)
Masa po m <sup>2</sup> (cca.)	42.4 kg/m <sup>2</sup> (kilogram po metru kvadratnom )
Masa palete(cca.)	960 kg (kilogram)
BETON I VLAKNO CEMENT	4 kom (komad )
Komada na paleti	192 komad

## LAF-/FLA VRIJEDNOSTI
